

In the specification:

Please amend the bottom portion of Page 36 as follows:

A¹ and A²-A⁷ and A⁸ are independently of each other a group

one of R⁵, R⁶ and R⁷ is a halogen atom, like a chlorine atom, bromine atom, or iodine atom, and the others are as defined above and X¹ is as defined above. The diketopyrrolopyrroles of formula III are novel and represent intermediates in the production of the diketopyrrolopyrroles of formula I.
